Dia 25: Departures

Remarks to technical support:

For presentations we need PC with connection to Internet and Data projector. We have all our presentations in Power point.

We assume that Italian/Portuguese partners will be able to translate our presentations from English into Italian/Portuguese.

We (me and all seniors) will have our NT with us. For blended mobility we need access to Internet. We will work with address <http://isev.osu.cz>. Ideal situation is to have also Data projector during blended mobility, if it is possible.

We will also present some of seniors' results like photo books, booklets and posters. Mainly for posters we will be very glad to have space to present them (three posters A2 format).
