

# Blended mobility

ZDENKA TELNAROVA

# Blended mobility together with project meeting

- Agenda for 7 days (blended mobility and project meeting)
- Who will attend?
  - 5 seniors from each partner institution (leaders from each senior's group)
  - 3 people - ISEV staff from each partner institution
  - 32 people involved
  - Anybody else? .....

# What we have to do?

- Seniors will present their work during pilot of ISEV courses. 5 seniors from each partner institution, it means 20 presentations (we need at least 2 days).
- Seniors will be trained in on-line piloting for the role of teacher. How communicate in virtual classroom, how update virtual classroom, how to prepare activity for schoolmates, etc. (1 or 2 days, it depends on administration).
- Project meeting (2 days – together with other activities).
- Activity prepared by Portuguese partners (2 or 3 days)

# Seniors' presentations

- **Content:**
  - Name, annotation of the course
  - Goals of the course
  - Using ICT, using virtual classroom
  - Students' help
  - Activity of seniors
  - Social inclusion
  - Results
- **Duration:**
  - One presentation 10 minutes
- **Technical support:**
  - Classroom for at least 32 people, better more
  - PC or notebook with access to Internet, data projector

# Seniors' presentations

- **Translations:**
  - Each presentation will be in national language with translation into English, Italian, Portuguese, Czech (to complicated??????)
  - Translation only into English?????
  - Each partner country support translation from English into their national languages and reversely .
- **Time approximation:**
  - $20 \text{ seniors} * 10 \text{ min (presentation)} * 20 \text{ min (translation)} = 600 \text{ minutes, 10 hours}$

# Course in using virtual classroom as a teacher

- Discussion about two possibilities:
  1. Zdenka will prepare manual for the course and each partner arranges teacher who will lead the course during blended mobility. Zdenka will train those teachers before and will monitor particular groups. (Three groups separately with 3 teachers)
  2. Zdenka will teach course for all seniors and each partner arranges translations. (Three groups separately with one teacher)

I prefer 1. possibility. It saves time.

# Course in using virtual classroom as a teacher

## Administration:

To save time it will be better to have 3 classrooms and run courses at the same time (provided that we choose 1. possibility). Is it possible?

In other way ( for example only 1 classroom is available) we will run course for seniors from one country and the others will have another program.

## Time approximation:

Instructions to the teachers 1 hour.

1 course 5 hours, if we have 3 classrooms we need only 1 day, if not, we need 2 days.

# Project meeting

- Agenda will be created later.
- Project meeting can be arranged on the same days as presentations or training, for example in the afternoons.

# Program prepared by Portuguese colleges

- Dulce, Vera, can you explain your idea about the program, including social event?
- You have 2 or 3 days for it.

# Administration by Portuguese colleagues

- Recommendation for accommodation for all foreign people.
- Keep on mind that Czech and Italian seniors have only 55 EUR per day. Portuguese seniors do not have any grant.
- Accommodation for Czech and Italian seniors about 30 EUR per day. Is it possible?
- ISEV staff can have more expensive accommodation.
- Rooms for blended mobility (32 people, PC, Internet, Data projector)

# Date and venue for blended mobility

- 28.8.2019 – 3.9.2019 or 27.9.2019 – 3.10.2019 ????
- Venue??????
