

# Methodology (IO2)

ZDENKA TELNAROVA

# Bases for Methodology

- Structure for the common Methodology
- All partners have prepared one course outside the ISEV Methodology a one course within ISEV Methodology.
- All partners have described differences between those two approaches.
- All materials are on our web site  
<http://projekty.osu.cz/isev/methodology.php>

# Methodology

- Vera has prepared proposal of the Methodology (28.1.2019).
- Zdenka has commented it (1.2.2019).
- No other comments, no reaction on my comments.
- **I think that common Methodology has to be list of the concrete steps that have to be followed to reach our ISEV goals.**
- **What is your opinion?????**
- You perfectly know the goals:
  - ICT/SMART technology
  - Inter generation dialogue
  - Active approach of seniors
  - Social inclusion

# Methodology

- The basis for our ISEV Methodology could be elaborated documents for the ISEV courses.
- Follow that steps, prepare and run course according them.
- Try to generalize theses steps on other courses.
- Think about how this Methodology can be shared by other institutions! In what it can be useful?

# Methodology

- Unfortunately we do not have final version of the Methodology but we have to start our courses according to that Methodology!!!!
- It is a problem. According to the schedule Methodology could be finished January 2019!!!
- I recommend running courses according to the filled forms for the ISEV course (we all have them).
- We have to do our best to finish Methodology as a final document for the project results and dissemination.
- **All partners** – remarks to the Vera proposal and Zdenka comments till 28.2.2019.
- **Vera** – second version of the Methodology for another commenting till 10.3.2019.

# Methodology

- **All partners** – remarks, comments to the second version till 20.3.2019.
- **Vera** – final version of the Methodology till 31.3.2019.
- **Please keep this schedule!!!!**
- **Final version together with comparative study will be disseminate.**
- **Discussion about dissemination later.**
